### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Richardson on July 13, 2007.

The application has been amended as follows:

In the Claims:

1. (Currently Amended) A method for music distribution to a user comprising:
  - downloading a content file in a proprietary first data format from a remote server of a content source to a first user device for preview at a first cost basis, said content file including at least one entire song in full fidelity;
  - providing a player associated with the content source suitable for decoding said content file encoded in the first data format;
  - granting a capability to convert said content file to a second data format by paying a second cost basis; and
  - converting said content file to said second data format.

8. (Currently Amended) A system useful for distributing content to a system, the system including an audio playback subsystem; the system comprising:

means for storing encoded content from a content source, said encoded content including at least one entire song in full fidelity encoded for preview in a first protected format associated with the content source;

means for decoding the encoded content for playback directly on the audio playback subsystem, said means for decoding also being associated with the content source;

means for conducting a payment transaction with a means for receiving payment; and means for converting the encoded content into a second format.

20. (Currently Amended) A system useful for distributing content to a system, the system including an audio playback subsystem, the system comprising:

a memory configured to store encoded content from a content source, said encoded content including at least one entire song in full fidelity encoded for preview in a first protected format associated with the content source;

circuitry configured to decode the encoded content for playback directly on the audio playback subsystem, said circuitry configured to decode also being associated with the content source;

circuitry configured to conduct a payment transaction with a payment receiver; and circuitry configured to convert the encoded content into a second format.

## REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Regarding claim 1

The prior art of record neither anticipates nor fairly and reasonably teaches downloading a content file in a proprietary first data format from a remote server of a content source to a first user device for preview at a first cost basis, said content file including at least ***one entire song in full fidelity.***

Regarding claims 8 and 20

Claims 8 and 20 are each parallel in subject matter to the feature noted above with respect to claim 1 and are allowable for reasons similar to those provided for claim 1.

The most remarkable prior art of record is to Warnock et al. (WO 01/29732) and Kobata et al. (US PG Pub. 2002/0082997).

Although Warnock et al. disclosed many features similar to those recited in the above-indicated claims, Warnock et al. still fails to teach the above-noted features in the above-noted claims.

Kobata et al. discloses techniques for controlling and managing digital assets when digital assets are transmitted electronically using the Internet.

It is clear from the description of Kobata et al. that the prior art does not consider the possibility of downloading a content file in a proprietary first data format from a remote server of a content source to a first user device for preview at a first cost basis,

Art Unit: 3625

said content file including at least **one entire song in full fidelity**, as recited in the independent claims 1, 8 and 20.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- (i) JP 2003066972 to Stoguchi, Katsu discloses a system that allows to download desired song data from a server, wherein said song data can be reproduced after download.
- (ii) PR Newswire. New York: Oct 3, 2000. pg.1, "Succeeding Where Napster Failed, GotchPort! Bridges the Gap Between the Interests of Labels and Fans" discloses providing music content to customers for previewing for a predetermined period of time; once the previewing period has ended the customer is then prompted to purchase the track.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
